

## Extensible metal spreader

Product code: 1613103100

Metal spreaders are made of steel, painted, lubricated, have a high margin of strength.

It is a reliable mechanism that fully complies with SOLAS-74 Convention as amended and tested according to applied regulations of IMO MSC.81 (70) and MSC.200 (80) Resolutions.

The spreaders are intended for attaching collision mats (and other items) planted to hull breaches of the vessel, as well as for reinforcing manhole plates, neck holes and other structures.

Our enterprise manufactures extensible metal spreaders in two typical sizes:  
Type I is manufactured according to a client's order.

Type II:  
Length, min/max, mm: 1000 x 1700  
Working load, kN: 15/10  
Mass, kg: 8,5

Type III:  
Length, min/max, mm: 400 x 600  
Working load, kN: 30/30  
Mass, kg: 7
