

## Emergency screw clamp for bulbous frame

Product code: 1613104100

The emergency screw clamp is used on vessels of sea and river fleet for fastening of emergency collision mat to hull breaches. The beam of emergency screw clamp is made of two reinforced channel bars connected with slats. The beam is equipped with two removable grabs to capture bulbous frame with a lock-screw and a clamp-block. The grabs are made with setscrews. Also the beam is equipped with a nut slider with a clamping screw. The grabs are made hook-shaped, welded, connected by an axis in the middle portion.

### Specifications:

- Service lifetime - 15 years;
- Warranty period - 1 year;
- Colour - blue;
- Length - 720 ( $\pm 10$ ) mm;
- Length of clamping screw - 360 ( $\pm 10$ ) mm;
- Max. grabs opening - 48 mm;
- Width of clamp - 100 ( $\pm 10$ ) mm;
- Mass - 17 ( $\pm 0,1$ ) kg;
