

Position indicating light

Position indicating lifejacket light is specially designed to indicate the position of a person in the water.

It is made as a lithium battery-powered emergency light fitted to be installed on all kinds of lifejackets and immersion suits and fastened by a special clamp.

Electronic sensor automatically switches on the device when effected by salt or fresh water. Luminous intensity is not less than 0.75 candella in all directions of the upper hemisphere for a period of at least 8 hours.

Product code: 1011109100

Position indicating light for lifejackets complies with the requirements of Chapter 6 of Part II of "Rules for the Equipment of Sea-Going Ships", 2011, of chapter II of LSA Code as amended and IMO Res. MSC.81 (70) standards as amended.

Specifications:

- Dimensions: 44 x 43 x 31 mm;
- Total weight: 28 g/38 g including buckle;
- Flashing frequency: 51 - 54 times per minute;
- Battery: lithium;
- Bulb: white LED, 0.35W, 50 mA;
- Activation: water sensor & manual switch;
- Duration and light intensity: more than 28 hrs not less than 0.75cd (standard requires 8hrs);
- Working temperature: from -1°C to + 30°C;
- Storing temperature: from -30°C to + 65°C;
- Shelf life: 5 years.
