

## Foam Fire Extinguisher FS6-LH

The FS6-LH fire extinguisher is portable and easy-to-use device designed for tackling fires of class F, such as those involving cooking oils and fats. Featuring an aluminium body and pressure gauge, this spray foam extinguisher is both durable and reliable. With a capacity of 6 liters, the FS6-LH is an excellent choice for home or workplace use, providing a quick response in the event of a fire emergency. It is also suitable for extinguishing class A and B fires.

**Product code: 1816102100**

Foam extinguishers work by creating a thick layer of foam on the fuel source, preventing the fire from spreading and depriving it of oxygen. They are also known for their ability to cool down the fuel source, reducing the risk of re-ignition.

Foam fire extinguishers are ideal for use on flammable liquids, such as gasoline, diesel fuel, and oil, as well as for extinguishing fires caused by solid combustibles like paper, wood, and cloth. They also can be used on electrical fires as long as they are not energized.

Certified to meet the requirements of the Marine Equipment Directive MED 2014/90/EU and CEN EN3.

## Specifications:

- Capacity: 6 lt;
- Fire ratings: 27A 233B;
- Extinguishing agent: water + additives;
- Discharge time: ~ 65 s;
- Overall height: 545 mm;
- Bottle OD: 160 mm;
- Weight: Empty - 1,8 kg / Charged - 7,8 kg;
