

## Embarkation ladder

Product code: 1012101100

Embarkation ladders are used for embarkation and disembarkation of people into/out of lifeboats/liferafts and also at carrying out different outboard works: painting sides, cleaning anchors, scuppers, inspecting weld seams, etc.

According to SOLAS requirements, the ship ladder are made of hemp rope, which is safer for embarkation or disembarkation. In addition, it is better to hold on to the ropes, otherwise, you might squeeze your fingers between the ladder rungs and the hull of the ship.

**Storm ladders, manufactured by MARKO Ltd in compliance with the requirements of SOLAS 74 as amended Reg. III/4; Reg. III/11; Reg. X/3 IMO Res. MSC 81(70); IMO MSC1/Circ. 1285; ISO 5489**

**Are delivered with the original Manufacturer Certificate for the batch.**

*You can buy embarkation ladders from 2 to 30 metres long.*
