

1 Anti-piracy razor wire:

Product code: 1710101100

A concertina configured steel wire is used for outer boundary fencing on ship's deck to defend ships from the vandals, like pirates. The razor wire prevents any intruders from penetrating by deterring them and preventing from boarding the vessel.

Specifications:

Diameter 500-1000 mm;

2 Night vision binocular:

Product code: 1710102100

Night vision equipment, including binoculars, is widely used in military and security services, as well as on sea-going vessels for monitoring in the night time and to identify pirate attacks at night.

3 Military dummy:

Product code 1710103100

A military dummy simulates the presence of armed guards on board, which forces pirates not to attack the vessel.
