

## Reflective tape SOLAS

The SOLAS reflective tape is used to mark immersion suits, life jackets, lifeboats, rafts, life buoys and other marine safety equipment. The tape is made of an elastic, silver-white material and consists of a metallized layer that provides high reflectivity over a wide range of angles. It can be used in all weather conditions and perfectly retains its reflective qualities even in severe operating conditions at sea.

**Complies with IMO Res. A.658 (16);  
Approved by Wheelmark, Bureau  
Veritas and MED.**

### Advantages:

- The surface layer is made of a strong, highly transparent polyurethane film;
- Provides reliable protection for the functional surface;
- Highly resistant to aggressive environments, flexible;
- Reinforced adhesive coating securely attaches reflective tape to equipment;

### Specifications:

- Dimensions: width 50,8 mm, length 45,72 mm;
- Weight of a roll at package: 1,2 kg;
- Shelf life: 10 years in accordance with specifications;
- If drenched, the reflective tape loses only 10% of its reflecting capability;

**Product code: 1011110100**
