

## Red handflare

Red hand-held, short range distress signal is used to pinpoint location by day or night.

It produces hot red flame for a minimum of 60 seconds at no less than 15000 candela.

Performs reliably even after immersion in water. Features a unique telescopic handle with improved grip, making it very compact and space saving when stowed in a liferaft. It is easily extended and pull wire operated.

**Conforms to: SOLAS 74 as amended, IMO resolution MSC. 81(70) Part 1; (MED)2014/90/EU, 2013/29/EU, USCG.**

### Specifications:

- Length: 175 mm (6.9 in);
- Length with handle pulled out: 280 mm (11 in);
- Diameter: 28 mm (1.1 in);
- Weight Max: 176g (6.2 oz);
- Light intensity: not less than 15,000 candela;
- Burning time: 60 seconds;
- Colour of light: red;
- Ignition: pull-wire ignitor;
- Net Explosive Content, Max.: 63 g;
