

CO2 Fire Extinguisher-3.5

CO2 fire extinguishers-3.5 are typically used on Class B and Class C fires. Class B fires involve flammable liquids such as gasoline, oil, and other petroleum-based products, while Class C fires involve electrical equipment such as computers, power tools, and other electrical appliances.

CO2 fire extinguishers are effective in these types of fires because they do not conduct electricity and they are able to suffocate the fire by displacing oxygen.

However, CO2 fire extinguishers are not recommended for use on Class A fires, which involve solid materials such as wood and paper, as they may not be as effective in extinguishing these types of fires.

Temperature range is between -20 and +50°C. The term of service is 10 years.

At your request we perform annual technical service at the enterprise of the client!

Specifications:

- Volume of shell - 5 l;
- CO2 content - 3.5 kg;
- Fire-killing capability - 34B;
- Fire extinguisher full weight, not more than - 12 kg;
- Minimal jet length - 2 m;
- Discharge time - from 9 to 16 sec;
- Height - 618 mm;
- Diameter - 140 mm;

Product code: 1815103100
